

PCTEL video script	
<u>VIDEO</u>	<u>AUDIO (VO)</u>
	<p>Technology is evolving faster than ever, with consumer demands for seamless wireless connections continually on the rise.</p> <p>For more than 25 years, PCTEL has been a leading global supplier of RF systems that meet these and other challenges, helping enterprises, public safety personnel, and utilities manage and maintain secure wireless connection.</p> <p>With the evolution of Industrial IoT and 5G, industries must evolve to remain competitive. To do so, they need a partner they can rely on to provide reliable wireless communications.</p>
	<p>Every day around the world, PCTEL solutions provide wireless technology that enables faster and more seamless communications,</p> <p>And our advanced tools test and measure the effectiveness of the infrastructure that enable network connections.</p>
	<p>Innovation is at the heart of everything we do, an ongoing commitment to continuously evolve, leveraging technologies that promote meaningful change.</p> <p>Our team of engineers represent some of the industry's best, dedicated professionals who are committed to help organizations solve complex wireless challenges to remain connected.</p>
	<p>That includes a focus on the Industrial Internet of Things, where their work is revolutionizing the workspaces of nearly every industry, including manufacturing, utilities and transportations.</p>
	<p>[PCTEL exec onscreen, providing details about IoT]</p>

	<p>Their I-O-T innovations impact products all around us, automating processes that eliminate human error. Like ovens that can be controlled wirelessly, drawing on artificial intelligence to prepare everything just right. And that self-correct, when necessary, minimizing the impact when events proceed ... well ... unexpectedly.</p>
	<p>And smart grids that allow for more precise meter readings, and that can be performed in the harshest environment.</p>
	<p>And they're leading the way in providing solutions that leverage the full power of 5G, providing a competitive advantage for early adopters.</p>
	<p>[PCTEL exec onscreen, providing details about 5G work]</p>
	<p>At PCTEL, we embrace a customer-centric approach that meets companies wherever they are on the route to network modernization.</p> <p>Whether working with 4G, 5G or perhaps even a legacy system, we deliver the tools and products that enable carriers to meet the escalating demands of a data hungry public.</p>
	<p>We pride ourselves on our decades-long relationships with local, state and federal government agencies and their teams of first responders, developing solutions that enable them to reach those in need quicker and more accurately, no matter the challenges.</p>
	<p>And we provide critical communications support that impacts public safety, ensuring that communications are transmitted and received reliably and efficiently, no matter the external event.</p>
	<p>Rishi soundbite on critical communications</p>
	<p>At a time when voice and data requirements continue to rise, the job of the network operator has become far more complicated. Increased customer usage means an increased risk of radio frequency interference. The result</p>

	<p>can be anything less than a seamless wireless experience.</p> <p>Our testing and measurement equipment allows operators to measure and then minimize network interference, preserving signal strength and in the process, customer loyalties.</p>
	<p>Ours is a corporate-wide commitment to deliver the tools and solutions that organizations and agencies need to meet the evolving communication needs of their partners.</p> <p>And to provide communications that help them solve complex wireless challenges, ensuring they stay connected, transform and grow.</p>
	<p>[PCTEL exec onscreen, addressing PCTEL values/mission, picking up from the above cell]</p>
TAG #2	<p>We're PCTEL.</p> <p>Enabling effective and efficient communications.</p>
